Hi Levi,

You have been providing us with a robust service for our high speed Wi-Fi Internet connection, to guests and staff at our busy hotel: Quality Hotel, Wembley for over two years.

The whole experience has been a pleasure and I and my management particularly appreciate Zonerider 'going the extra mile' to ensure that the service runs smoothly.

Actually Zonerider is so robust, secure, easy to access and manage, and I remember the personal effort you put in to make sure that installation was quick and the set-up matched our exact requirements.

As one of the busiest, up market business hotels in North West London, with three hundred rooms, popular restaurant and bar and extensive business facilities, we get substantial business from the adjacent national stadium and exhibition centre.

Providing reliable, value for money wireless Internet access is a critical component of our service and is essential for the many organised groups, conferences and business meetings we host.

We are really pleased that we chose Zonerider over other major telecom providers with their high prices, inflexibility and lack of personal service.

I have no hesitation in recommending Zonerider as the ideal Wi-Fi provider for the hospitality sector.

Yours sincerely

Michael Rahimi  
General Manager  
Quality Hotel Wembley
